

Organic Pigments

Very high concentration of pigment, bright colors, limited follow-up treatments

The Organic pigments of Nouveau Contour are organic and free of iron oxides: your guarantee that they are void of nickel impurities. The product composition contains less alcohol: the same pigment volume contains more pigment. The result? A higher concentration of pigment will remain in the skin, resulting in bright colors. An additional advantage is that the low concentration of alcohol will dry out the pigment less quickly. The formulation is developed with unique bonding materials, allowing for optimal skin implementation and pigment retention. The Organic pigments have excellent flow properties which enables effortless pigment deposit. During the procedure, the pigment is more easily inserted into the skin. The colors remain clear and fresh. After healing, the results are very natural and follow-up treatments are limited.

The Organic pigment range includes 38 colors, 9 eyebrow colors, 3 eye colors, 12 lip colors, 5 areola colors, 4 camouflage colors and 5 areola colors.

UNIQUE! Simplify color selection

Color Identification System (CIS)

Nouveau Contour's unique Color Identification System simplifies the complexity of color theory, making it easy to choose the correct pigment for each procedure and every skin type. All of the relevant information is available for each pigment color, providing technicians with added confidence in the color outcome of the skin.
